SAC•SAN®
METAL FACTORY

*30 years
is a long time*

Founded in 1993 in Bursa with great efforts, Sacsan Metal Factory has been expanding over the years and we continue to develop by adding expert professional teams to our team. We support both production and development within the Sacsan Metal Factory family with our proven, most successful machines and expert team. We are in Bursa/Turkey with our team of 48 people to respond to your demands in the best way. Contact us As Sacsan metal factory, let us turn your designs into reality with the best workmanship with our strong R&D team and production team.

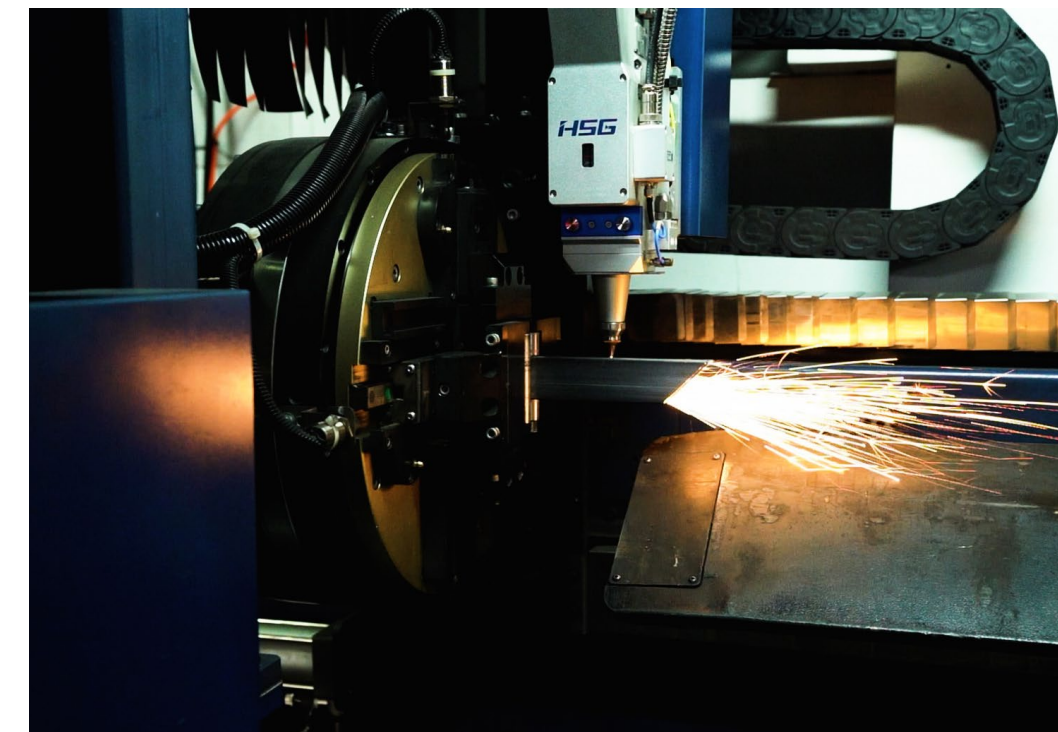

DESIGNS SHAPED BY **THE POWER OF METAL**

As Sacsan metal factory family, we are always working to provide customer-oriented solutions and customer-oriented solutions with our strong R&D team and our production line that constantly follows technology.

PRODUCTION EMPOWERED BY TECHNOLOGY

Sacsan maximizes efficiency and quality by integrating modern technologies into its production processes. With its engineering infrastructure and technical capabilities, it manufactures precisely shaped products with high accuracy.

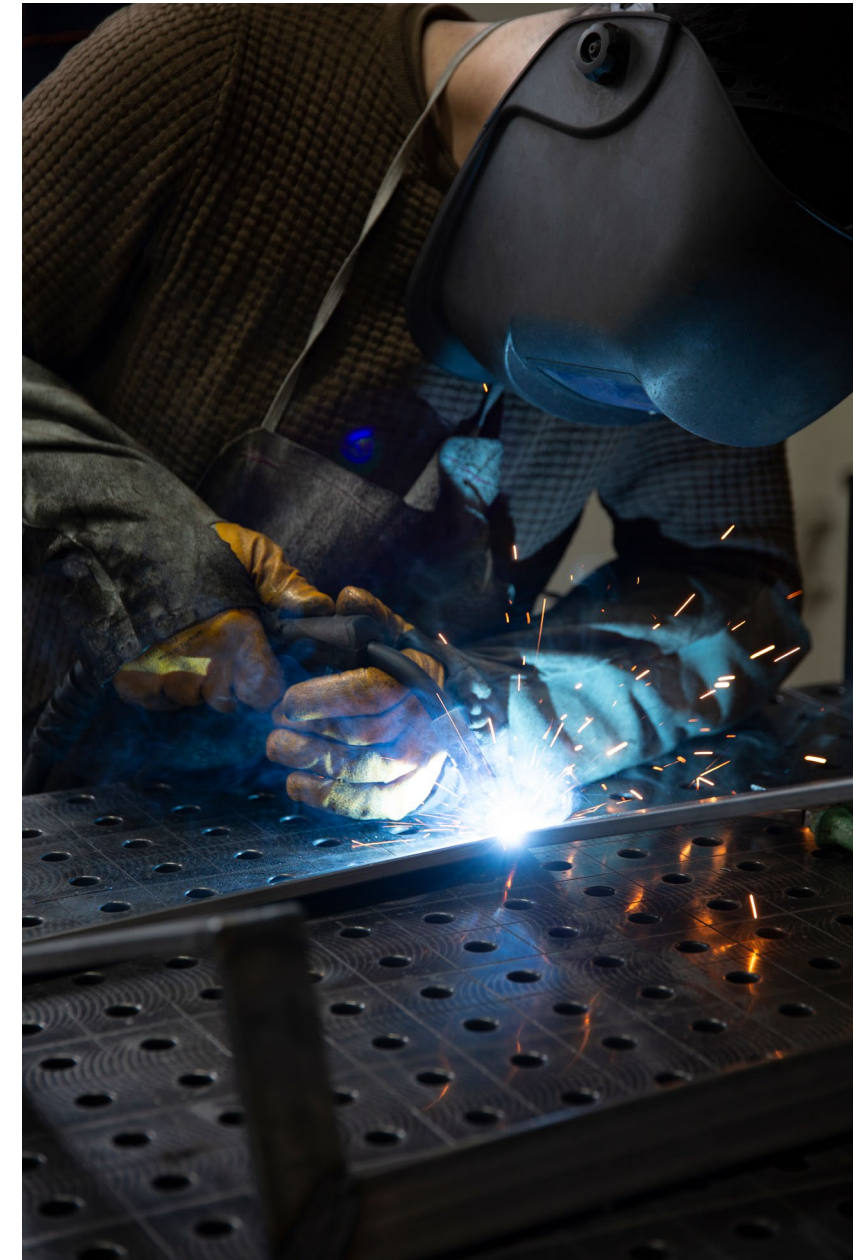

TRUSTED
MANUFACTURING
POWER

VALUE HIDDEN IN **DETAILS**

With our experience in sheet metal processing, we realize your demands in the best way.

CRAFTSMANSHIP

BLENDED WITH AESTHETICS

While carrying the original ideas of designers to production, we analyze possible problems in the production process in advance with our technical knowledge and experience and offer the most efficient solutions in terms of both cost and functionality.

We always prioritize precision in production and durability of the product. We offer reliable and durable products to our customers with our production processes in accordance with international quality standards.

THE MARK OF CRAFT
IN **EVERY PRODUCT**

By combining precision, aesthetics, and quality in production, we deliver products that add value to living spaces.

FROM
SPARK TO
QUALITY

THE
FOUNDATION
OF A **SOFA**
**LIES IN ITS
LEGS**

We produce by being
faithful to your designs.

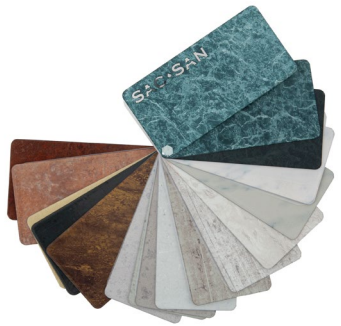

Each sofa design carries its own
line. We transform this line into
elegant and sturdy legs.

NATURAL TEXTURES ON METAL

We don't just shape metal, we add character.

We apply various wood, marble and stone patterns to the metal surface with the sublimation technique, which you have probably never experienced before. Since we use special resin powder coatings in this process, we ensure that our products are much more durable than other painted products, even outdoors.

AESTHETIC BEGINS WITH **BALANCE**

The table legs we produce with different material options are reinforced with coatings suitable for both indoors and outdoors. Surface strength and resistance to scratches ensure long-lasting use.

THE FOOTPRINT OF ELEGANCE IN **ARMCHAIR LEGS**

In the production of armchair legs, we focus on form, balance, and material harmony. Each piece is crafted to complement the character of the armchair design, with precision applied at every stage—from surface treatment to color finish.

When designing each table leg, I don't just focus on function—I consider how that leg will give character to a space. We create legs that not only support but also define the identity of the furniture. The proportions, geometry, and surface textures of each model are thoughtfully chosen for its intended use.

WE MANUFACTURE **SOFA LEGS**

We carefully process every detail in the production of sofa legs. We offer solutions that combine aesthetics and functionality in different forms, on different surfaces. At the center of our production process; fidelity to size, surface quality and high strength are at the center. It is our job to make the invisible visible, to make a difference in detail.

DISCOVER OUR EXPERTISE IN **SOFA LEG MANUFACTURING**

We don't see sofa legs as mere supports—they're integral to the overall design. In every project, we produce legs that combine aesthetics and durability, offering a wide range of forms and surface options.

THE PROCESS BEHIND DURABILITY

A DIFFERENT **SURFACE** FOR EACH PROJECT

In our production process, we prioritize not only aesthetics but also durability. We subject our products to appropriate surface treatments to ensure long-term durability against external conditions.

We make coatings in various colors in our facility. By carrying out all processes under our own control, we offer customized surface solutions for each project.

FROM DESIGN TO PRODUCTION

THE **HEART** OF PRODUCTION

We process the metal with different processes and deliver it to you in the most suitable way for your demand.
As Sacsan Metal Factory family, we take part in sectors such as hotels, cafes and restaurants with our project implementation works.

Contact us. As Sacsan metal factory, let us turn your designs into reality with the best workmanship with our strong R&D team and production team.

Thanks to the state-of-the-art laser cutting, CNC bending and robotic welding machines in our production line, we are able to mass produce with high precision and low tolerance.

Each part is produced with the same quality standards and minimal errors. This ensures continuity, speed and confidence in projects.
